JURA hygiene certified by TÜV Rheinland
The Swiss coffee specialist was awarded the certificate for high hygiene standards in an independent test by TÜV Rheinland. As part of an independent microbiological test, JURA coffee machines were subjected to daily use for a period of several months while scientists performed analyses on hygiene-relevant components. The results revealed that JURA coffee machines are extremely hygienic. The tests included all coffee-carrying components such as the brewing group and coffee spout as well as the water tank, bean container, grinder, powder chute, coffee grounds container and drip tray, cappuccino frother, cappuccino pipes and milk container.
